WORK EXPERIENCE

Software Engineer
Societe Generale Global Solution Centre

06/2022 - Present
Global Payment Engine

Tasks

- **Worked** on an internal application for **settlements** and **SWIFT payments**, including migration of a legacy desktop application to web application, developing **APIs** for the system.
- The application enabled the company to save **2.3 million Euros** by optimizing settlements and SWIFT payment processes, enhancing overall operational efficiency.
- Used **JPA, Hibernate, JDBC Template** for database operations and **React.js** for UI.
- Experience in Junit testing, SonarQube, Sonar lint, Git, Autosys.
- Developed a **testing tool** using the **Cypress framework**, which significantly improved the efficiency of regression testing saving **4 man days** in each release.
- Took **ownership** of developing and scheduling a batch process that **automatically send email** alerts to the back-office team, providing them with timely updates on pending advice statuses.

Software Engineer Intern
Societe Generale Global Solution Centre

01/2022 - 06/2022
ISO message comparator tool

- Developed a standalone application that will provide a summarised report highlighting all the differences and missing entries in the ISO messages compared using **Nodejs**.
- **Collaborated** effectively with members of Software Development Team and personnel in other departments.
- Prepared and submitted reports and other documentation to assist, development team members.
